WINE MADE FROM EXTREMES

The Gorge Wine region is a powerful place. It's a place of extremes—in climate, scenery and style of wine—where the astounding beauty of the landscape is inextricable from its allure as a world class wine region.

It's a modern frontier, of sorts, undergoing discovery and growth while holding fast to what makes it special. The extreme conditions that shape the wine are unique to this region—to be sensed, embraced, and celebrated.

Creativity is at the heart of the vision for Gorge Wine. The region is marked by an intrepid spirit that seeks to craft something extraordinary through inspiration in dialog with the land.

**EXPERIENCE THE EXPRESSION OF 40 MILES
OF INTENSE GEOGRAPHY AND TRANSITIONING CLIMATES**

Less than an hour east of Portland, nestled between the majestic peaks of Mt. Hood and Mt. Adams lies the Gorge Wine region. This grape-growing district is defined by the Columbia River as it cuts through the Cascade Range at the only sea level passage,

between the Arctic Circle to San Francisco. Here, terrains range from nearly sea level to alpine, with highly variable aspect. The dramatic transition in topography is enhanced by the influx of cool moisture from the Pacific, which brings 50+ inches of rain per year to the eastern foothills of the Cascades but drops as little as 10 inches on the region's arid, inland end.

Though most wine regions don't cross state lines, the Gorge Wine region is comprised of an intrepid group of winemakers and growers on both shores of the river, in Oregon and Washington, bound by their passion for the work and commitment to the land. Utilizing more than 50 different premium grape varieties grown across this 40 mile stretch, winemakers have a unique opportunity to create distinction and reveal place as they hone their craft.

Vegetation control is done by the pigs, cows, chicken, ducks and geese that dwell here during different parts of the year.
